

## Practice spotlight

At the Beaumont ACO, we like to acknowledge practices that go the extra mile when it comes to caring for our patients. This month we would like to recognize Beaumont Heath Medical Center – Garden City.

The Garden City practice introduced the concept of “Diabetic Day” in 2018 at their clinic, which is a great way to educate many patients about their chronic condition and assist them with getting needed services completed.

The clinic most recently completed their second event in April 2019. The Garden City team went above and beyond in reaching out to patients and communicating to them the benefits in participating in “Diabetic Day.” The event included dietitians, pharmacists and residents, alongside the practice physicians, clinical managers and staff. All participants helped educate and demonstrate ways for diabetics to achieve their optimal health.

We would like to thank the Beaumont Medical Center - Garden City team for their hard work and for putting in the time to make Diabetic Day a success. This is a great example of patient and family-centered care.
