

Provider Delivered Care Management update

Beaumont ACO has partnered with eligible primary care practices since 2018 in Provider Delivered Care Management. PDCM is an integral part of our Patient Centered Medical Homes and core element of the Value Partnership Physician Group Incentive Program as part of our Blue Cross Blue Shield of Michigan contract.

The focus of PDCM is to deliver services such as patient education and other support service to those patients requiring additional care coordination. These care coordinators work collaboratively with physicians, their practices and other health care professionals to provide individualized, whole person focused care.

Currently, Beaumont ACO PDCM Care Coordination team is assigned to various practices. The efforts of this team are calculated into BCBSM value-based reimbursement for each of the practices they support. The BCBSM VBR results for 2018 have recently been released. We are pleased to announce that eight out nine practices, which have participated in Beaumont ACO PDCM program, received an PDCM VBR to their BCBSM reimbursement. In the coming months, we are working to expand participating practices within PDCM and increase the VBRs received for the 2019 performance year.

Donna Mimikos, RN

Director, Care Coordination
