

## **Information Technology – Updates**

### **PCP Scorecard**

At the direction of the Beaumont ACO Quality and Utilization committee, the ACO analytics team has developed a PCP scorecard containing key ACO measures across our primary commercial and Medicare contracts. This scorecard will provide consistent measurement across all these contracted plans as compared to ACO benchmarks. Look for it in the first quarter of 2019.

### **Beaumont ACO Website – Physician Portal**

Currently, a secure physician portal for our physicians is under development. This portal will be used for provision of information such as the PCP scorecard, education, program/plan information and other resources. Keep an eye out for communications on these new features also in the first quarter of 2019.
