

ACO Medical Director Visits – Update

As we started off 2019, we at the Beaumont ACO had a goal of reaching out to our MSSP and PGIP aligned practices, over 120 offices, and I am proud to report that by the end of March, we have accomplished 29 of these visits. The visits are being conducted by myself as well as by our associate medical directors, Halima Ali, M.D., and Sasi Boppana, M.D. The visits also include a Beaumont ACO team member from Quality, Care Management, AIM, and/or the PGIP field team. We are visiting these practices to share performance reports and educate physicians and staff on these value-based programs. We have been sharing data available by the practice and individual providers for MSSP and PGIP, if applicable, along with quality and utilization scorecards. It has led to a lot of positive discussion on the care, quality, cost per patient and what we can do to impact it. Additionally, it has helped identify and engage other patients for the AIM program. As we move forward for the rest of the year and current contract, we welcome recommendations and suggestions to improve and engage patient care and quality.

Thank you,

Sarju Shah, M.D.
Medical Director
Beaumont ACO
